## Introduction

For over 25 years Sound on Stage have been providing equipment hire to the entertainment industry and corporate sector. We have established a reputation for providing innovative and cost effective solutions in realising the ideas of producers and others in the areas of musical and dramatic theatre and opera, corporate and exhibition presentations and touring musical artists.

Our clients include broadcast companies, recording studios, corporate and government agencies as well as independent producers and musicians, theatres, clubs and other venues. Broad experience and unequalled resources have made Sound on Stage first choice for serious professionals.

This catalogue will provide hirers with a guide to the type of equipment available, but as **our inventory is constantly being updated**, if something is not listed **please ring** as we can arrange any reasonable request.

Prices shown are a guide only, may vary due to availability etc. Prices are quoted in Australian dollars (AUD) and are given as "Dry Hire" rates - long term hires, regular clients and large jobs are all eligible for discounts. The price shown is the daily hire rate (ex GST) per item. Price per week = 4 x daily rate. Package systems and equipment purchase are also available.

Don't forget we also sell and install a large range of professional audio, video and broadcast and business products backed with design, contracting, installation and divisions. We provide solutions, sales and support for any creative or technical application.

## RECORDING EQUIPMENT
